

UFO OBSERVATIONS (pp. 2-4)

On a photo taken on 27 April 2008 at Bad Camberg, the photographer later discovered an ovoid shape – just an insect or bird flying through the frame. In a picture of a motorway near Bremen snapped on 1 April 2009, a man later found two green bars – these were identified as lens reflections of the approaching car's headlights.

FALSE MEMORIES AND UFO ABDUCTIONS (pp. 5-21) Thomas Bullard's study of the false memory syndrome and UFO abductions, outlining similarities and pointing out differences, taken from the Journal of UFO Studies 8, 2003, part 1.

REMARKS ABOUT UFO RESEARCH (pp. 22-27)

Some thoughts about the current state of UFO studies in Germany – too little science, too much opinion, too much ad hominem attacks.

BRIEF NOTES (pp. 28-29)

Howard Menger dead – The famous American contactee died on 25 February 2009.

Lady Bug as UFO – A photo taken on 12 July 2008 in Danmark was identified by UFO-Sverige as a lady bug!

A New Stimulus – As Thai lanterns have been banned in most federal lands of Germany, we can expect a wave of sightings due to balloons with blinking electric lights.
