

# JOURNAL FÜR UFO-FORSCHUNG, No. 187, 1/2010

## ENGLISH SUMMARY

---

### **UFO OBSERVATIONS (pp. 2-9)**

*New classification of case 19950203 G* – In Jufof 109, 1997, p. 2, we reported a UFO observation from 3 February 1995, at Achim near Bremen, of a green beam in the sky. This was classed as PROBLEMATIC UFO. However, new developments have made it necessary to class it as an IFO. We have learned that between 1994 and 1998, the Bremen OHB Umwelttechnologie GmbH made experiments with a new LIDAR (Light Detection And Ranging) system, sending green beams of light up into the sky – and the institute is only a few kilometres from Achim, and exactly in the direction the witness was looking.

*Lights to the north of Hamlin* – For several weeks, starting on 1 September 2009, three persons observed stationary coloured lights in the sky which they photographed and called „a coloured UFO or a coloured space man“. The young main witness thought they were Nazi flying disks. Analysis of one photo reveals scaffolding close to a red light, it is therefore identified as possibly from a military installation (a training ground is situated where the light was seen), or a lamp on a construction crane.

*»Suddenly it stank like hell«* – On 10 October 2009, at 1 a.m. in the night, several witnesses at Berlin-Schöneberg observed, over a longer period of time, an oval object which shot towards them until it came as close as 50 m. It then disappeared suddenly. The observers perceived a strong stink and heat, several witnesses had to vomit. Rarely do we receive reports of objects that are so close to the witnesses, and create illness. However, the report only came via email, and the alleged witness never reacted to our inquiries, so we class this case as insufficient data or hoax.

### **FALSE MEMORIES UND UFO ABDUCTIONS (pp. 10-14)**

Thomas Bullard's study of the false memory syndrome und UFO abductions, outlining similarities und pointing out differences, taken from the Journal of UFO Studies 8, 2003, part 6. This part concentrates on the similarities between abduction reports over time and space.

### **A UFO FROM 1561? (pp. 15-19)**

A broadsheet showing celestial signs over Nuremberg from 1561, first introduced by CG Jung, is generally interpreted as an example of a very early UFO sighting. The author points out, however, that it is simply a variation of the common sky army prodigy, with the weapons of the fighting armies updated by depicting cannons – which ufologists have compared to „motherships“ or „cloud cigars.“ The cannon motif had been used earlier to show exploding noises of meteors, and similar motifs in later broadsheets are pointed out to show that other pamphleteers took up this innovation in their pictures of sky battles.
