

# JOURNAL FÜR UFO-FORSCHUNG, No. 219, 3/2015

## ENGLISH SUMMARY

---

### **UFO-OBSERVATIONS (pp. 66–73)**

Hans-Werner Peiniger

On 6 April 2015, a Mögglingen man photographed a UFO he saw flying across the disc of the moon. This could positively be identified as exhaust trail from a plane, a Boeing 787-8 Dreamliner.

On 12 April 2015, a Malsch man observed a point-like light moving slowly or almost stationary in the sky close to the star Polaris. This was identified as a weather balloon released in Stuttgart.

### **ADDITIONAL REPORTS / PART 15 (pp. 74–84)**

On 5 February 2015, a man took a photo of a con trail illuminated by the sun over Handewitt-Haurup to claim, for fun, it had been a UFO, but when he later viewed the image, he discovered a real bright UFO in his picture! At the request of Hans-Werner Peiniger, he took a second photo in daylight which revealed the UFO had been a street light.

On 28 February 2015 a Haimhausen man took a picture of a multi-coloured UFO with portholes – a lens flare and the reflection of the camera in the window.

In 19 April 2003, a Zwönitz man took an automatic video of an approaching thunderstorm to later find a strange ball of light moving through the frame for about two seconds. This was identified as ball lightning.

### **BRIEF NOTES (p. 81)**

Extra-terrestrials are a Responsibility of the Federal Lands – Should aliens land in Germany, dealing with them will be the responsibility not of the state, but of each Federal land.

### **DO WE NEED A RE-EVALUATION OF CASE 19870619 A, COMISO? (p. 82–88)**

The photographic case from 19 June 1987, when a man took several Polaroids of a disk-like UFO over Comiso in Sicily, is one of the good UFO cases of the GEP. Now Hansjürgen Köhler has suggested that what the man saw was an American BGM-109 Tomahawk cruise missile tested in the region. However, as Hans-Werner Peiniger shows, the manoeuvres had already ended, the time the UFO was in sight was far too long for it to have been a missile, also, only one photo can be likened to a missile, but not the rest.

### **THE »ROSWELL SLIDES« IN RETROSPECT– A BAD EXAMPLE FOR METHODS IN UFO RESEARCH, PART 1 (p. 89–94)**

Starting in 2011, rumours began to circulate the net that new colour slides of a Roswell alien had been discovered. Danny Ammon outlines this episode which finally collapsed when it was shown that the slides showed a museum mummy. A second instalment will give the reasons for this research debacle.

### **REVIEWS (pp. 95–96)**

No English language books are reviewed in this issue.
